

## Submitting Airport Runways to Analyze

1. Login to AGIS as consultant assigned to the airport or airport sponsor to add runway ends for SAV analysis.
2. Click on Surface and Analysis Visualization from AGIS dashboard.

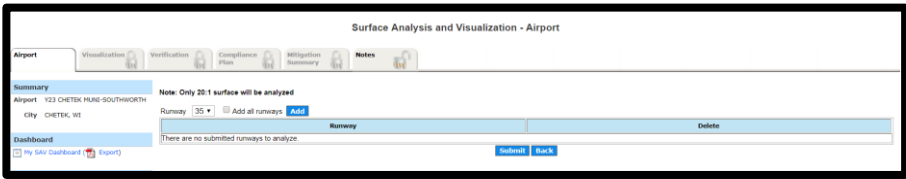

3. Popup is displayed with option to click on Accept. Enter airport and click Submit. SAV dashboard is displayed.

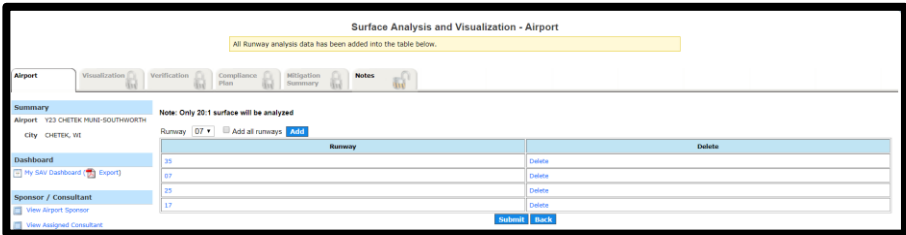

4. To analyze 20:1 surface on all runway ends, select Add all runways, and click Add.

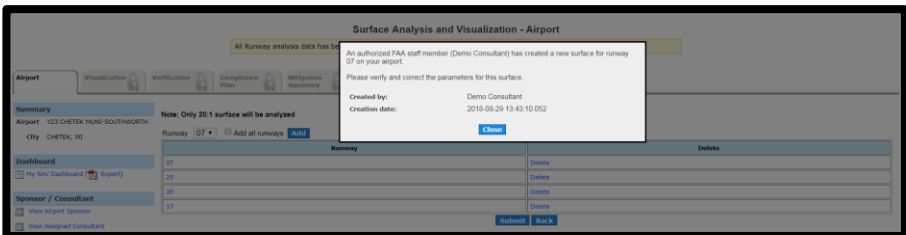

5. To analyze individual runway end, select from runway drop down and click Add.

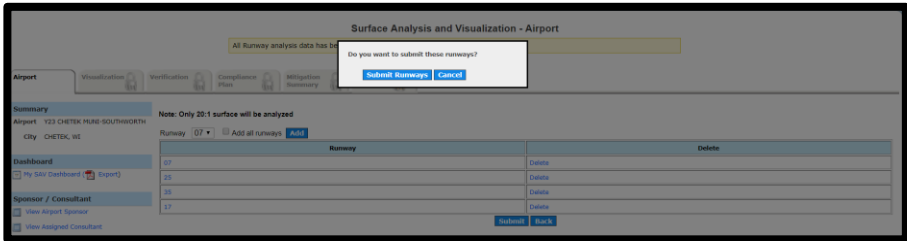

6. Repeat the above steps to add more runway ends for analysis. Click on Delete to delete the specific runway end that is added for analysis.

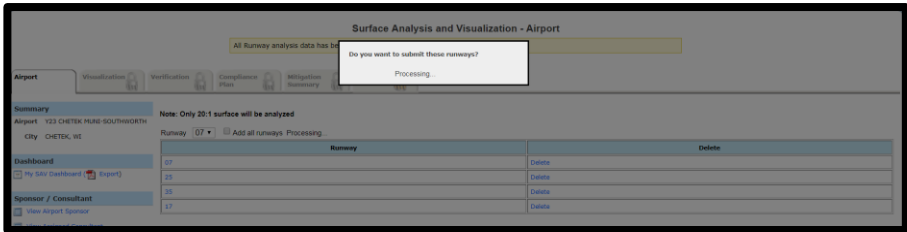

7. Click on the runway end hyperlink to view information about who created the runway end for analysis.

8. Click on Submit to submit runway ends for analysis. All Analysis is only for 20:1 surface.

9. Click Submit Runways and the tool processes your request.

10. When the processing is completed, all the tabs in the SAV dashboard are unlocked.
